

Foundation Insulation

BPI CEU's: 3.25

Prerequisites: None

Description:

This is an in-depth one-day class that covers techniques and best practices for insulating foundations in the Weatherization Assistance Program. We will cover characteristics of foundations and how best to approach these sometimes-challenging installations. Included will be proper vapor barrier insulation in foundations, air sealing techniques for foundations, duct sealing techniques for foundations, worker safety, standards, and acceptable insulation application.

Learning objectives:

By attending this session, participants will be able to:

- Recognize the importance of air sealing prior to insulation
- Locate and verify access to specific work areas
- Identify guidance and standards for acceptable installations
- Organize equipment, tools, and materials necessary for proper installation
- Demonstrate installation of vapor barrier, insulation, and air sealing measures
- Validate effectiveness of installed measures
